SUMMARY

A prominent **Data Analyst** with strong expertise in **MS Excel, Power BI, Tableau, SQL, and Python**, with a strong focus on data visualization and storytelling. Worked on multiple industrial-level analytical projects involving large datasets (**2,000+ records**) and developed dashboards that drive smarter, data-driven business decisions.

EXPERIENCE

DATA ANALYST INTERN

Rows & Columns, Kozhikode, Kerala

July 2025 – January 2026

- Worked on real-time industrial projects where my role included data cleaning, transformation, and visualization, helping improve team productivity by around **25%**.
- Created weekly reports and shared key insights with internal stakeholders to support better decision-making.
- Built **3+ interactive dashboards** using Excel and Power BI, which reduced manual work and saved nearly **30% of reporting time**.
- Analyzed trends and patterns from large datasets to provide clear and useful business insights.

PROJECTS

Fuel Pricing Database Management System (Excel VBA)

Rows & Columns, Kozhikode, Kerala

July 2025 - January 2026

- Formulated an **Excel VBA UserForm-based fuel pricing database** with insert, edit, update and delete functionality.
- Implemented automated currency and unit conversion to standardize **5+ formats** (EUR, USD, GBP etc.) into a single USD/gallon format.
- Engineered automated calculations for the “Total All In” fuel cost by integrating base price, multiple fees, and VAT, reducing **manual computation errors by 80%** and improving reporting accuracy.

CRM Sales Performance Analysis (Power BI)

- Designed an interactive dashboard to analyse **2,000+ CRM records**, reducing manual reporting time by **40%**.
- Evaluated sales performance across **8+ industries** and assessed monthly pipeline health.
- Identified top-performing sales agents and tracked conversion rates across **5+ countries**.
- Used Power Query to clean and transform data and created **5+ DAX measures** for accurate and scalable calculations.

WISP

Sacred Heart College, Thevara, Ernakulam

November 2024 - February 2025

- Developed **WISP**, a web-based interactive study platform using **Python and Angular**, supporting **3 distinct user roles** and **100+ users**.
- Structured role-based access for **Admin, Teacher, and Student** modules, reducing manual academic coordination by 40%.
- Integrated features such as **study material uploads, assignment submissions with deadlines, and leave management**, increasing task completion by 30%.
- Deployed an **AI-powered chatbot** to handle **real-time student queries**, resolving **70%+ doubts instantly** and enhancing overall student support.

EDUCATION

Bachelor of Computer Applications (Mobile Application and Cloud Technology)

2022-2025

Mahatma Gandhi University, Kottayam
CGPA - 8.13

COURSEWORK

BASIC PYTHON - Idatalytics, Infopark Kochi

May 2024 - June 2024

- Built a Python chatbot in **4 weeks** by applying core Python concepts.
- Improved Python **coding skills by 30%** through hands-on coding and debugging.
- Strengthened understanding of Python fundamentals by **30%** during project.

TECHNICAL SKILLS

- Power BI(DAX, Power Query), SQL, MS Excel(VLOOKUP, Pivot Tables, VBA), Python, Tableau, Data Cleaning, Data Visualization, Dashboard Development, Reporting, Business Analysis

SOFT SKILLS

- Communication, Leadership, Decision Making, Team Collaboration
